

## **The Learning Lab – MELBOURNE ONLY**

### **Ideas, Insights and Solutions for Better Learning**

The Learning Lab Melbourne provides sponsors and industry partners with the opportunity to share practical expertise, innovative thinking and real-world insights that help educators address the challenges and opportunities facing schools today.

Sessions are designed to be educational, engaging and solutions-focused, showcasing thought leadership rather than sales pitches. Presenters are encouraged to share research, case studies, emerging trends, evidence-based practices and lessons learned from working with schools and educators. While presenters may draw on their own products, services or experiences, the primary focus should be on delivering valuable learning outcomes for attendees.

The most successful Learning Lab sessions help educators solve problems, improve outcomes, discover new approaches and gain practical strategies they can implement immediately. Whether exploring artificial intelligence, student wellbeing, inclusion, leadership, literacy, STEM, libraries, workforce challenges or future learning, sessions should contribute to meaningful professional learning and align with the National Education Summit's commitment to innovation, evidence-based practice and educational excellence.

### **Presentation Guidelines**

- ✚ Educational and thought leadership focused
- ✚ Practical takeaways for educators and school leaders
- ✚ Evidence, case studies, or research encouraged
- ✚ Interactive and engaging delivery preferred
- ✚ Product demonstrations should support learning outcomes rather than drive sales
- ✚ Commercial sales presentations are discouraged

The objective of every Learning Lab session is simple: leave educators with valuable ideas, fresh perspectives, and practical actions they can take back to their schools.
